Student1719122	RAYYAN AHMED KHAN
Student1720250	Wahaj Mughal
Student1705662	MUHAMMAD BURHAN .
Student1712474	MUHAMMAD MUNEEB WAJID

Objectives of the project

The Objective of this program is to give a sample project to work on real life projects. These applications help you build a larger more robust application.

The objective is not to teach you HTML/JavaScript/Dreamweaver/HTML5 but to provide you with a real life scenario and help you create basic applications using the tools.

You can revise the chapters before you start with the project.

This project is meant for students who have completed the module of **Dreamweaver**. These programs should be done in the Lab sessions with assistance of the faculty if required.

It is very essential that a student has a clear understanding of the subject. Students should go through the project and solve the assignments as per requirements given.

Kindly get back to eProjects Team in case of any doubts regarding the application or its objectives.

Problem Statement

Jensen is an organization selling wide range of wall decorative products. They deal in various types of items suiting every requirement office to home and etc.

You are supposed to create a website for them with the below mentioned requirement specifications.

The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.

Requirement Specification:

The Web site is to be created based on the following requirements.

- 1) The Home Page should be created making use of Sections with a suitable logo, the header section can be added which will show images of various decorative products
- 2) The site must contain the links to navigate through any category for the information.
- 3) The site should display a menu which will contain following categories of products
 - Metal wall art
 - Wall papers
 - Photo frame art
 - Mirror art
 - Wall shelves
 - Wall mounted animals
- 4) Each menu option mentioned above should have sub categories according to the range of products available in that category.
- 5) The information should be categorized according to the brand names of the products like if a User wants to see only "Gloster" products or any other company products then he/she can click on a Link/button/menu etc and can see only that Brand chairs.
- 6) When a user selects any particular brand, a list of products for that brand will be displayed
- 7) A brief summary of features of the products should be displayed on the Web Page along with the picture but detailed Features should be stored in Individual Word documents which can be downloaded or viewed by the User who wishes to see the same.
- 8) The user should also be able to compare the various products of different as well as similar brands.
- 9) There should be a "Contact Us" page which will have the Address of the Company which should be displayed using GeoLocation API (eg. GoogleMaps) and the email address which when clicked will invoke the local mail client from where they can send an email.
